I don't even know how to describe it. ...you may put the book to the side until you are out of historical romances, then pick it up when you realize you have nothing else to read, then spend the next 20 hours (literally) reading, then want to kick yourself for not being intuitive enough to rush home and read it the first day you bought it.

Dee, reviewer from Dee & Dee Dish ... About Books

Enmeshed in a world of Music and Seventies culture, three friends struggle through love, loss, and secret passions, redefining themselves and their worlds along the way.

LK Hunsaker grew up creating stories in the midst of a widely artistic family. With a passion for books, music, and art, her writing career began with musical plays as a child and swelled to include poetry, short stories, novels, and non-fiction. Mother of two and wife of a US Army veteran, she has lived and traveled in many states and countries while earning a degree in psychology and studying both relationships and cultural issues. Along with continuous work on her writing, she is a network coordinator for a Sandplay center and part of a musician's online management team.
